

PROUD CONSERVATIVE REPUBLICANS

The parties that habitually govern attracted most of us, in our youth.

Those party "leaders" told us that, to take the money from who earn it, to spend it in improving the conditions of the population's life, is socially responsible "social justice."

With the time, we understood that it is not responsibility, neither "social justice", because they takes the money of those that saved a lifetime to assure their retirement, and now, pensioners should face misery and desperation, because of not covering their minimum necessities.

They takes the money of those that saved to elevate their level of life, to participate in a future trade, to undertake a business, or to acquire their housing, and by means of inflation, they takes the money of poorest and from those who are in state of need..

We are proud Conservative Republicans because we believe firmly that, each Argentinean should

have the freedom to work after his personal goals, without the pertinacious intervention of an intrusive state, which seeks to make everything in our behalf, wasting our development.

We, as proud Conservative Republicans, commit ourselves to work for diversity. Tyrants acquire their power through fomenting the sexual, social, ethnic and religious differences.

With Republican Governs, diversity will be the base of the peace in our republic

We are proud Conservative Republicans because we know that free trade is one of the fundamental pillars of the growth of the whole country.

Moreover, we are proud Conservative Republicans because we are absolutely convinced that the Conservative Republican Party is the suitable tool to take place in Argentina the transformations that our society needs.
